Professional Profile

A BSc Computer Science undergraduate with experience in Python and Java

With several experience in Python, I produced a few coding projects e.g. battleship, an expense tracking algorithm, a simple AI and many more. I was also tasked with a partner to provide a website's backend via Java.

Core Skills

- Flexibility in Programming
- Data Collection and Analysis
- Teamwork

Career Summary

[January 2022 - March 2022] (HELP International School) Intern
Outline
I applied for an internship programme at my school's EdTech to support any tech-related issues from students and staff.
- Surveying the school to check for technological issues

Key Responsibilities
- Fixing issues related to the macOS monitor.
- Managing any borrowed technology from the EdTech

Education & Qualifications

- University of Exeter: BSc Computer Science (Expected to complete in 2026)
- HELP International School: A Levels (completed in 2023)
- HELP International School: IGCSE (completed in 2021)

Projects
